**ABSTRACT:** The Washington Department of Fish and Wildlife has conducted bull trout surveys in Washington's portion of the Columbia River Gorge and Bonneville Pool since 2000. We surveyed from Rock Creek (Stevenson, WA) east to the Klickitat River. Bull trout were not found in Rock Creek, the Wind River, the Little White Salmon River, or the White Salmon River. Bull trout are observed in Hood River, Drano Lake and the West Fork Klickitat. Bull trout abundance levels are presented. A WDFW genetics analysis is also provided.
